## PROFILE SUMMARY

---

IT student interested in cybersecurity, cloud technologies, and IT operations. Focused on securing systems, maintaining reliable infrastructure, and supporting efficient technical services through practical knowledge in access control, troubleshooting, and automation.

## CERTIFICATIONS

---

- |                             |      |
|-----------------------------|------|
| • SAP Business One          | 2023 |
| • IT Specialist - Databases | 2024 |

## EDUCATION

---

|                                                                                 |                    |
|---------------------------------------------------------------------------------|--------------------|
| <b>BS Information Technology</b><br><i>Lyceum of the Philippines University</i> | 2019 - August 2026 |
|---------------------------------------------------------------------------------|--------------------|

## TECHNICAL SKILLS

---

- IT Operations & Support: Hardware setup, OS updates and patching, basic telephony support, break/fix troubleshooting, documentation and inventory
- Systems & Security Hygiene: Antivirus checks, least-privilege access practices, log visibility, operational monitoring
- Cloud & Automation: AWS IAM and S3 fundamentals, EventBridge task scheduling, Microsoft Power Automate
- Networking & Collaboration: Basic network configuration concepts, Microsoft 365, Google Workspace

## PROJECT EXPERIENCE

---

|                                                                                                                                                                                                          |      |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>Process Automation Mini-Project (Class Project)</b>                                                                                                                                                   | 2024 |
| <ul style="list-style-type: none"><li>• Automated repetitive data entry tasks using Microsoft Power Automate.</li><li>• Reduced manual effort by 60% and improved accuracy in sales reporting.</li></ul> |      |

|                                                                                                                                                                                                                                         |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Capstone Project (Thesis) — Team Lead (Ongoing early 2025–November 2025)</b>                                                                                                                                                         |
| <ul style="list-style-type: none"><li>• Leading a team of 4 students in developing a disaster preparedness game system.</li><li>• Coordinating task assignments, timelines, and progress tracking to ensure on-time delivery.</li></ul> |

## Personal Projects

### AWS Portfolio

- Implemented AWS IAM role-based access: created and assumed a read-only S3 role using temporary STS credentials, validating least-privilege and secure access patterns.
- Enabled AWS CloudTrail to capture IAM role usage and generated least-privilege policies using IAM Access Analyzer.
- Automated data refresh using EventBridge scheduled events to trigger Lambda.
- Applied IAM least-privilege practices across S3, Lambda, and Athena.
